

Strategic Objectives & Key Results

Operational Excellence

Top-quartile reliability (SAIDI < 100 min, SAIFI < 1.2)

Customer Centricity

Superior experience (CSAT > 85%, FCR > 80%)

Clean Energy Transition

50% renewable portfolio by 2030

Grid Modernization

Deploy smart grid across service territory

Financial Performance

ROE 9-10%, Operating ratio < 75%

Digital Transformation

End-to-end digitalization of operations

Business Capability Map

Customer Operations

Customer Enrollment & Onboarding

Billing & Payment Processing

Customer Service & Support

Complaint & Dispute Management

Energy Efficiency Programs

Demand Response Management

Asset & Network Operations

Generation Operations

Transmission Operations

Distribution System Operations

Substations Management

Asset Maintenance & Reliability

Outage Management & Restoration

Grid Monitoring & Control (SCADA)

Energy Management

Load Forecasting

Energy Procurement & Trading

Generation Dispatch

Renewable Energy Integration

Energy Storage Management

Balancing & Settlement

Grid Modernization

Smart Grid Implementation

Advanced Metering Infrastructure (AMI)

DER Integration

Microgrid Development

Grid Analytics & Optimization

EV Infrastructure Development

Regulatory & Compliance

- | Rate Case Management
- | Regulatory Reporting
- | NERC/FERC Compliance
- | Environmental Compliance
- | Safety & Reliability Standards

Financial Management

- | Financial Planning & Analysis
- | Revenue Management
- | Cost Management & Optimization
- | Capital Investment Planning
- | Risk Management
- | Audit & Controls

Workforce Management

- | Workforce Planning
- | Talent Acquisition
- | Training & Development
- | Safety Management
- | Labor Relations
- | Contractor Management

Technology & Data

- | IT Infrastructure Management
- | Application Portfolio Management
- | Cybersecurity
- | Data Management & Analytics
- | Digital Platform Management

Core Value Streams

1. Connect Customer to Grid

Application

Feasibility

Business Process Architecture

1. Generation & Supply

- 1.1 Generation Capacity Planning
- 1.2 Energy Procurement & Contracting
- 1.3 Generation Operations & Dispatch
- 1.4 Fuel Management
- 1.5 Renewable Integration & Management

2. Transmission & Distribution

- 2.1 Network Planning & Design
- 2.2 Grid Operations & Control
- 2.3 Substation Operations
- 2.4 System Protection & Reliability
- 2.5 Outage Management & Restoration

3. Customer Service & Billing

- 3.1 Customer Enrollment & Setup
- 3.2 Meter-to-Cash Process
- 3.3 Customer Inquiry Management
- 3.4 Payment Processing & Collections
- 3.5 Disconnection & Reconnection

4. Asset Lifecycle Management

- 4.1 Asset Strategy & Planning
- 4.2 Design & Engineering
- 4.3 Construction & Commissioning
- 4.4 Operations & Maintenance
- 4.5 Asset Performance Management

4.6 Retirement & Disposal

5. Regulatory & Compliance

5.1 Rate Design & Filing

5.2 Regulatory Reporting

5.3 Compliance Management

5.4 Integrated Resource Planning

5.5 Environmental Management

6. Finance & Accounting

6.1 Financial Planning & Budgeting

6.2 General Accounting

6.3 Accounts Payable/Receivable

6.4 Financial Reporting

7. Human Capital Management

7.1 Workforce Planning

7.2 Recruitment & Onboarding

7.3 Performance Management

7.4 Learning & Development

7.5 Safety Management

8. IT & Technology Management

8.1 IT Strategy & Planning

8.2 Application Management

8.3 Infrastructure Operations

8.4 Cybersecurity Management

8.5 Data Governance

Master Data Management

Data Governance Platform

Technology Stack

Compute Infrastructure

- On-Premise Data Centers
- Cloud Infrastructure (AWS/Azure)
- Hybrid Cloud Architecture
- Virtual Machine Platform
- Container Orchestration (Kubernetes)

Network & Connectivity

- Wide Area Network (WAN)
- Local Area Network (LAN)
- Software-Defined Networking
- MPLS Network
- Internet Connectivity
- 5G/LTE for Field Operations

Data Management

- Relational Databases (Oracle, SQL Server)
- NoSQL Databases (MongoDB, Cassandra)
- Data Lakes (Hadoop, S3)
- Data Warehouses (Teradata, Snowflake)
- Real-time Streaming (Kafka)

Security

- Identity & Access Management (IAM)
- Multi-Factor Authentication
- Firewalls & IDS/IPS
- Security Information & Event Management (SIEM)
- Encryption (Data at Rest & in Transit)
- OT Security (Industrial Control Systems)

Integration & Middleware

- Enterprise Service Bus
- API Gateway
- Message Queues
- ETL Tools
- iPaaS (Integration Platform as a Service)

Development & DevOps

- CI/CD Pipeline (Jenkins, GitLab)
- Version Control (Git)

- Container Platform (Docker)
- Infrastructure as Code
- Monitoring & Logging (Splunk, ELK)

Field Technology

- Smart Meters (AMI)
- Field Mobile Devices
- IoT Sensors & Devices
- GPS & Mapping
- SCADA RTUs
- Intelligent Electronic Devices (IEDs)

Disaster Recovery & Backup

- Backup & Recovery Solutions
- Disaster Recovery Site
- High Availability Clustering
- Business Continuity Systems

CROSS-CUTTING CONCERNS Governance, Security & Compliance

Security & Privacy

Cybersecurity, Data Protection, OT Security

Governance

Architecture Board, Standards, Policies

Compliance

NERC CIP, FERC, State Regulations

Data Quality

MDM, Data Governance, Quality Rules

Integration

Standards, APIs, Interoperability

Change Management

Release Management, Version Control

Architecture Framework Legend

Strategy Layer: Vision, goals, and strategic objectives

Business Layer: Capabilities, processes, and organization

Information Layer: Data domains, entities, and flows

Application Layer: Systems and applications portfolio

Technology Layer: Infrastructure, platforms, and tools

Cross-Cutting: Security, governance, and compliance

Framework Alignment: This Enterprise Architecture is aligned with TOGAF (The Open

Group Architecture Framework) and follows industry best practices for utility operations. It

provides a comprehensive view of the organization's strategy, business, information,

applications, and technology in an integrated manner.
